

Guidelines for dripper assemblies.

Puncture 20mm polytube with a sharp tool
Don't drill a hole.

Snap in a dripper.
The pipe will shrink onto the neck of the dripper and form a seal.

Push some Spaggetti tube onto the
Output barb of the dripper

Cut the spaggetti tube to your desired length
& attach a stake where you wish
the drips to be applied.

NB, A typical garden
Water supply is usually
Capable of running
Up to 100 drippers, so
Be careful how much
You turn the tap on!
